WORK EXPERIENCE

NxtWave Disruptive Technologies Private Limited(SDE-I)

Sep 2022 - Mar 2024

Hyderabad, Telangana, India

Developed REST APIs and frontend components using React, implementing and enhancing features based on business needs. Resolved server- and client-side issues, thoroughly tested features before deployment, and contributed to code reviews and Sprint discussions.

University College of Science, Saifabad, Hyderabad

2019 - 2022

MCA (Master of Computer Application) (7.6 CGPA)

Naveena Degree College, Khammam

2015 - 2018

B.Sc (Bachelor of Science)_Mathematics, Physics, Computers (MPCS) (73.69%)

Madeena CO-OP Junior College, Khammam

2013 - 2015

Intermediate_MPC (90.1%)

Z.P.S.S. Kannegundla, Dornakal

2012 - 2013

Secondary School Of Certificate (7.0 CGPA)

SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, React, NextJs

Backend: Python, Django, Node.js

Databases: SQLite

Testing: Unit Testing, Integration Testing

PROJECTS

AI Mock Interview Application

Developed a comprehensive AI-powered mock interview platform to enable personalized interview practice and feedback for users. The application delivers dynamic, data-driven interview sessions and provides targeted feedback.

- **Dynamic Interview Flow:** Integrated AI services to generate context-aware questions based on user responses, creating an interactive interview experience that adapts to performance.
- **Data-Driven Feedback:** Implemented AI analysis to offer comprehensive feedback and actionable improvement suggestions, enhancing the user's interview skills over time.
- **Backend Mastery:** Built robust REST APIs with Python and Django to manage user interviews, track progress, and ensure the secure handling of interview data. Leveraged Django queries to manage data efficiently, enabling real-time feedback.
- **React Frontend:** Developed a responsive frontend with React, enhancing the user experience by enabling smooth navigation, interview progress tracking, and feedback display in a user-friendly interface.

Technologies used: Python, Django, REST APIs, AI Services, React, HTML, CSS

Swiggy Clone ([Github Link](#))

Built a Swiggy-inspired food ordering application with essential pages and features, focusing on an intuitive user interface and smooth navigation across different sections.

- **Home Page & Navigation:** Designed a responsive home page with a structured navigation bar, including links to 'Home', 'Contact Us', 'Restaurant Card', 'Restaurant Details', and 'Cart' pages.
- **Restaurant Features:** Displayed restaurant cards with essential details and created a dedicated restaurant details page for users to view more information and menu options.
- **State Management:** Used Redux for state management, ensuring efficient data handling for cart functionality and a consistent user experience across components.
- **Routing:** Integrated React Router for seamless navigation across different pages, enhancing the app's usability and functionality.

Technologies used: React, Redux, React Router, HTML, CSS

Contact Management System Backend([Github Link](#)):

Developed a robust contact management backend with a RESTful API to handle complex user and contact management functionalities, prioritizing security, scalability, and data validation.

- **User Authentication:** Implemented user registration, login with JWT authentication, and email verification. Added password reset functionality using one-time codes for enhanced security.
- **Advanced Contact Management:** Built endpoints for adding, retrieving, updating, and soft deleting contacts. Enabled filtering, sorting, and batch processing of contact records for streamlined data management.
- **File Handling & Bulk Operations:** Developed features for bulk contact upload and updates through CSV/Excel files. Provided a download API to generate reports of contacts with creation dates and timezones.
- **Database & Security:** Used a SQL database with a normalized schema to ensure data integrity. Implemented transaction management for batch operations, along with rate limiting and password hashing for secure access control.

Technologies used: Next.js, Prisma ORM, SQL Database, Joi, JWT, CSV/Excel Processing
